Design. Build. Grow.

Get everything you need to build digital Air Force solutions

Our Mission

Platform 327 provides a virtual schoolhouse experience for designers, developers, and cross-functional teams

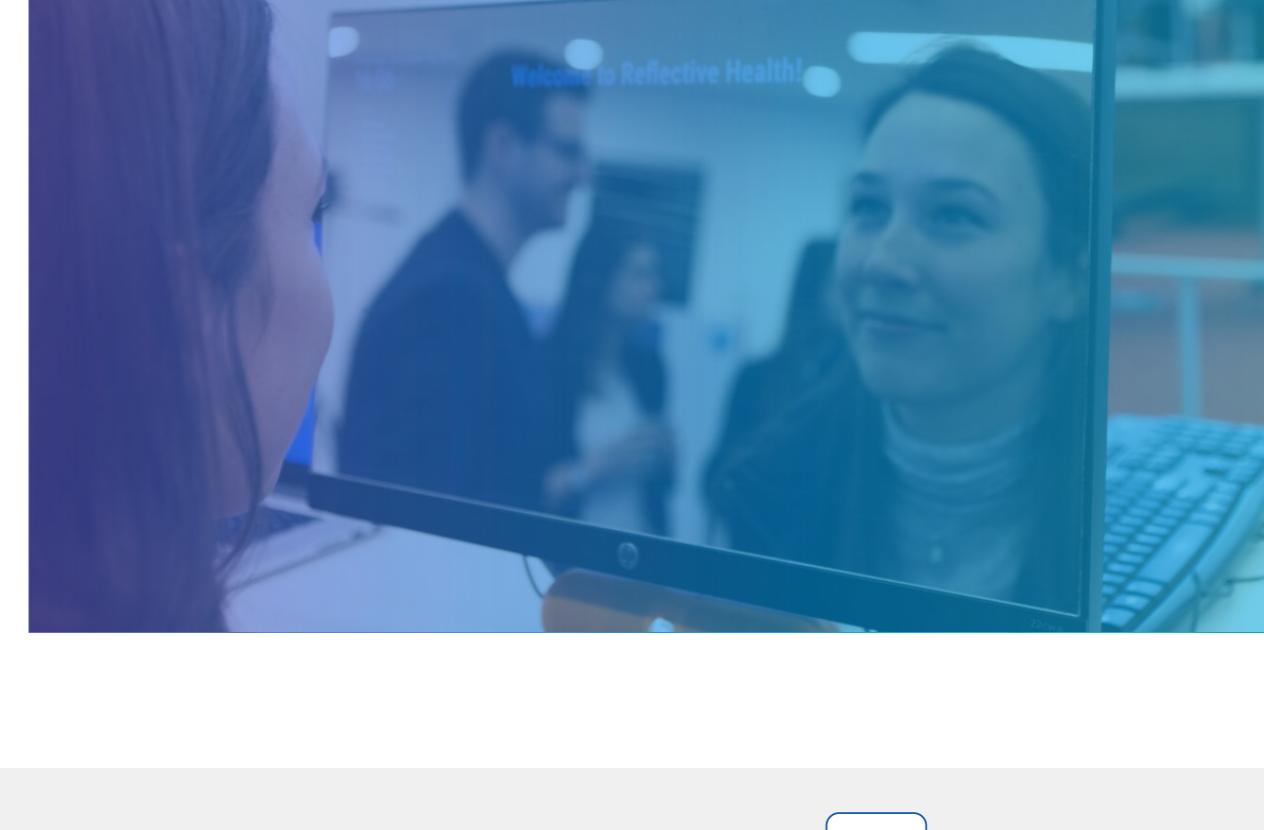

Welcome to Platform 327, the Air Force's first virtual design studio

- We've put together all the resources and tools you'll need to learn to design, engineer and deliver digital products.
- Platform 327 is part of the Air Force's Business Enterprise Systems Product Innovation (BESPIN), an agile development lab.

The BESPIN ecosystem fosters investigation, risk-taking and entrepreneurial thinking to turn innovation into reality.

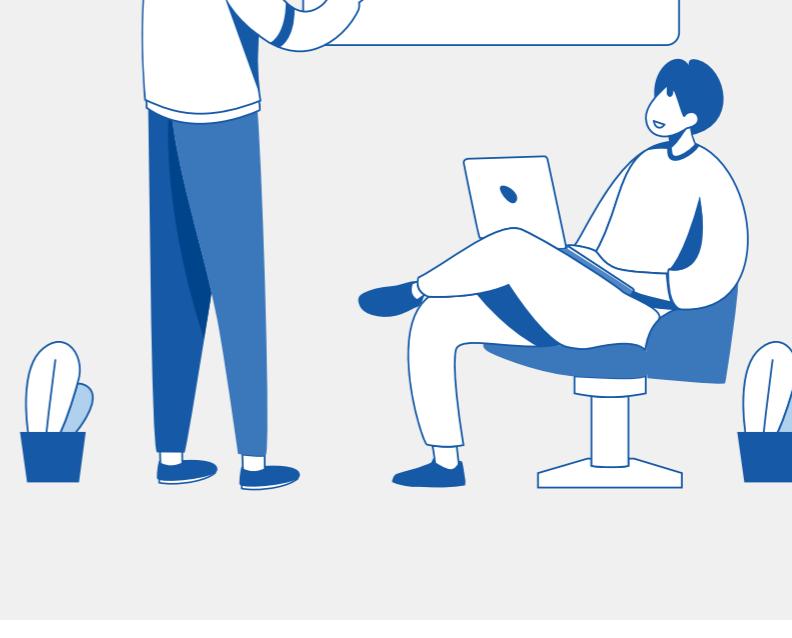

- Human-centered product design means creating tailor-made solutions for the people you are designing for.
- Whether you're a beginner who wants to know more or an advanced designer or engineer seeking expertise, we have resources, toolkits, courses and training events for you.

Join Platform 327

Learn to implement critical UX practices for design projects and engineer cutting-edge products that can solve even the most difficult problems, from human resources management to training, retention and beyond.

PointSync

PointSync is a multi-device app that streamlines cargo location data and delivery times.

[Download](#)

Design Learning

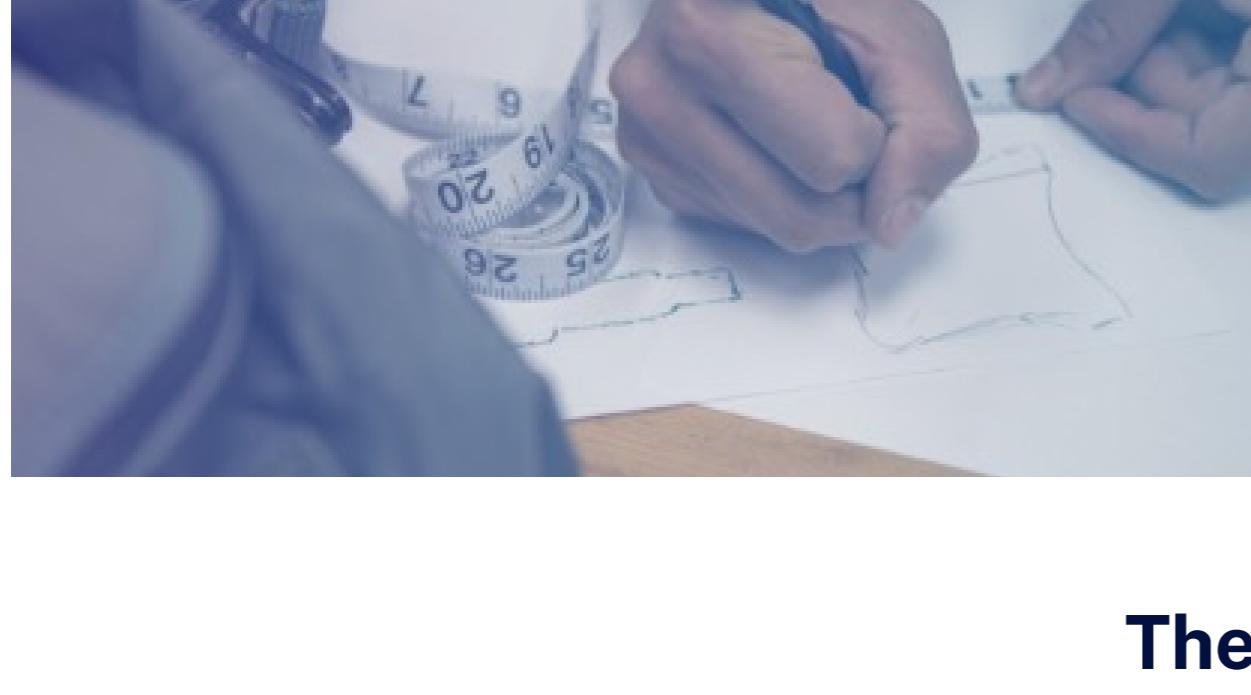

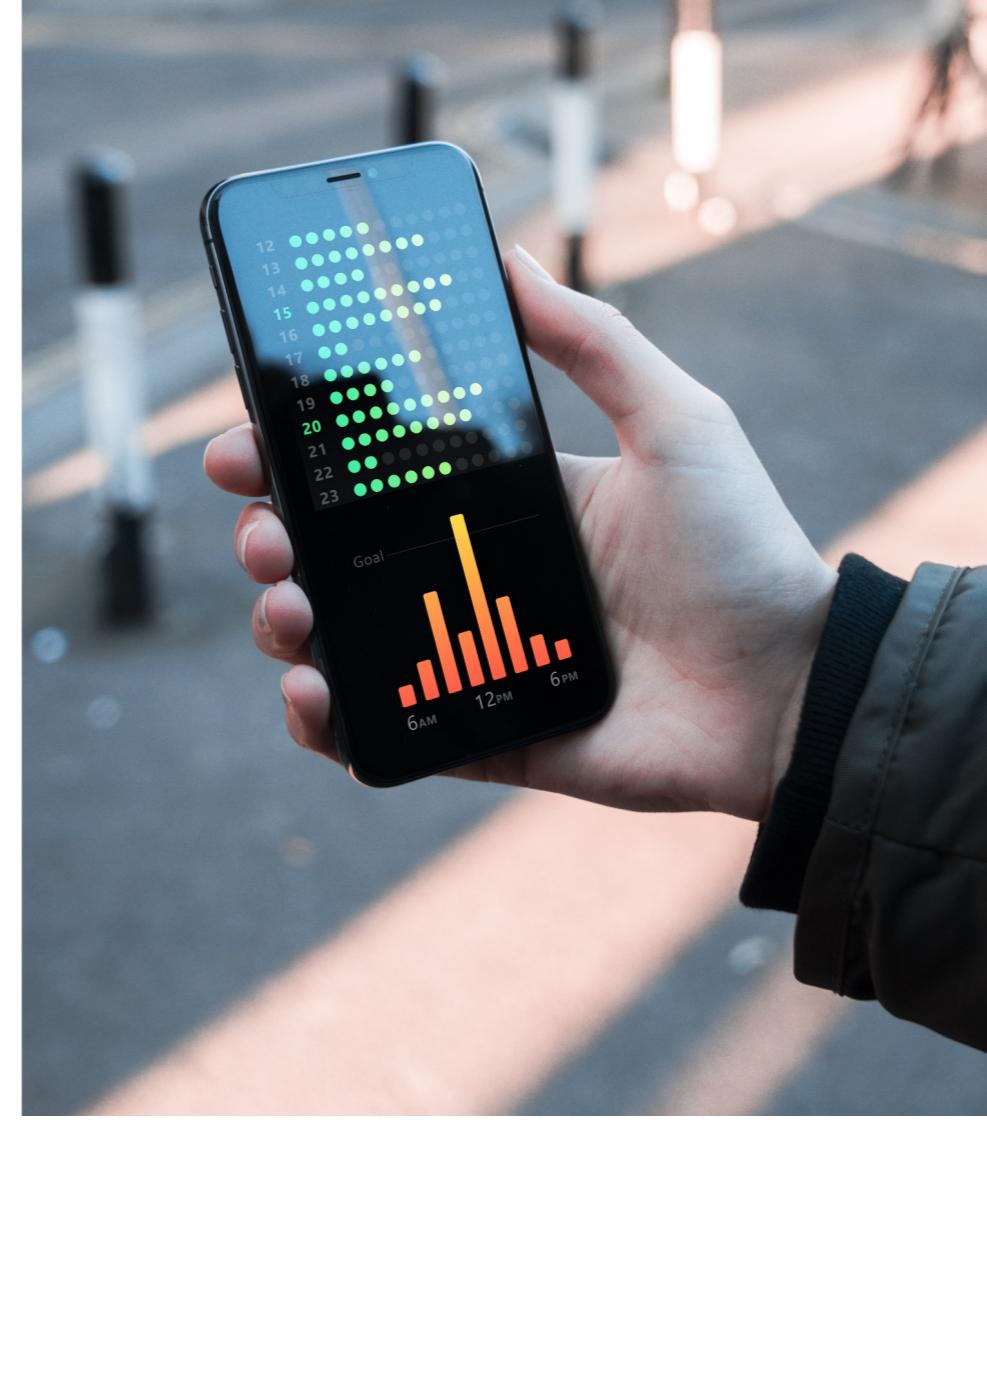

About

As part of Space Force, AFB Buckley spent the last two years ramping up the base vehicle and cargo movement operations that helped deliver hardware and small prototypes for test fuel systems. Airmen at AF Buckley use PointSync, to efficiently plan hardware delivery and storage and track hardware for prototype assembly. The app eliminates manual paper entry and using data collected from smartphones and wearable tech to reduce overall hardware delivery time by 35%.

"Most importantly, we needed to optimize how we track materials and new prototypes being assembled at speed, never done before. The development of PointSpot made help our service teams to become more integrated into the greater Space Force mission."

PROBLEMS IDENTIFIED:

- The cargo itinerary was managed by a small service team utilizing lightweight vehicles and all done with manual entry to base's EPICORE system.
- Traditional GPS tracking systems were not sufficient in supplying accurate location data of this specific cargo for onsite facilities.

How did Platform 327 help?

- After developing the first beta design of PointSync, the design team worked with Platform 327 to create a UX testing plan to track user pain points.
- Conducted remote working sessions to audit the app's data collection and delivery recording and verification.
- Develop user feedback function in app's onboarding to inform design team's product roadmap.

FAQ

What is Platform 327, and how does it help design teams?

Platform 327 is a digital design studio that combines all the resources and tools you need to design, develop and deliver digital product solutions.

Our UX Skills Assessment as well as training events and courses help design teams evaluate skill sets, build on those skill sets, identify challenges and solve problems.

I am a new UX designer for my project team; how can Platform 327 help my team and me?

Platform 327 offers a UX Skills Assessment to identify strengths, priorities and interests and determine areas where you can grow to make the most impact. Our Introduction to UX training prepares designers to create effective and efficient products that meet the user's needs. Our UX Library includes a category specifically dedicated to designers, as well as a bank of additional learning resources.

How can you sign up for sessions?

Visit the Platform 327 page. This will tell you where to start. Select the course you're interested in and fill out the form.

What is UX Skills Assessment, and why should I consider taking one?

A UX Skills Assessment will help identify strengths, priorities and interests. It also identifies areas for growth so that you and your team can make the most impact.

Human-centered product design can require a broad range of skills, including usability testing, information architecture and visual design. Our skills assessment will help ensure your team has all the necessary skills to succeed.

What resources are available for UX designers, engineers and project teams?

Check out our BESPIN Apps page and see recent apps developed by designers within BESPIN, and look at the BESPIN Ecosystem and Case Studies for best UX practices from those projects.

You can also go to our contact page and submit a request for a UX designer or UX design team for your project. The Platform 327 studio team will get back to you soon for next steps and recommendations.

How are Platform 327 and Air Force BESPIN related?

Platform 327 is part of the Air Force's Business Enterprise Systems Program Innovation (BESPIN) at Maxwell Air Force Base in Montgomery, Alabama. It uses agile development to quickly implement ideas aimed at improving mission support capabilities.

Platform 327 is a virtual schoolhouse for designers, developers and cross-functional teams learning to create the digital solutions that will ultimately improve the lives of airmen and women.

I am from an AF Base and/or from another DoD unit interested in finding a team with design and UX capabilities; how can I find a project team?

For UX designers, check out our UX Library page, which houses design and UX resources, the BESPIN Design System, a link to core Digital UX courses and tracks, and UX toolkits.

For engineers and project teams, we've put together toolkits and guides on how to implement basic UX practices and testing for design projects. We also provide ongoing workshops and events on Platform 327.
